**Recommended Use:** As a dietary supplement, mix 30 grams (approx. one scoop) in eight ounces of water or any other beverage per day, or as directed by your health care practitioner.

Whey Best is made with a proprietary native whey protein concentrate from grass fed dairy cows. This is done so in a way that maintains a full range of the fragile immune-boosting and regenerative components naturally present in fresh raw milk. It is produced using proprietary filtration and drying which involves minimal processing. This unique production method ensures that the whey is not subjected to temperatures that would destroy key health-promoting compounds. This superior protein comes from herds that graze year-round on disease-free, pesticide-free, chemical-free, natural grass pastures. Milk from grass-fed cows has many times higher levels of CLA and contains a proper balance of essential fatty acids. The milking cows are never fed grain or subjected to any growth hormone treatment, chemicals, antibiotics, genetically modified organisms, hyper-immunization or injected pathogens. The result is the highest quality protein formulation available.
